The Bureau of Vital Statistics compiles geographic, demographic, and medical data reported in birth, death, marriage and divorce records. These data are required for health programs, medical research, population estimates, and for meeting other needs of governmental agencies and the private sector.

This report includes the most frequently requested information. Historical tables for the past 35 years are also included to identify trends in selected vital events.

The Texas Department of Health takes pride in the timely release of its vital statistics data.

Texas Vital Statistics 1985

This publication includes the vital statistics data most frequently requested. Natality and mortality data are classified by county and city of residence of the mother for births and fetal deaths and by county and city of residence of the deceased for deaths. Marriages are reported by county in which the marriage license was issued and divorces are reported by county in which the divorce decree was granted.

Statewide birth and death rates are based on provisional population estimates published by the Bureau of the Census, U.S. Department of Commerce. The estimated population of Texas as of July 1, 1985 was 16,370,000.

The data presented in this report were compiled and tabulated by the statistical staff of the Bureau of Vital Statistics and the Bureau of Automated Data Services. The Report was printed by the Reprographic and Educational Services Division.

More detailed residence data as well as data by place of occurrence are available from the Statistical Services Division, Bureau of Vital Statistics, Texas Department of Health, 1100 West 49th Street, Austin, Texas 78756. A fee may be charged for developing special reports.
